Colt Mumbai 1 & 2 Data Centres

Location Data Sheet

colt
Data Centre Services

Two Data Centres Delivering **22MW of IT Power**

Our Colt Mumbai 1 & 2 Data Centres are located in Navi Mumbai.

Both facilities are designed to a Colt tier 3 specification and together provide 22MW of IT power. These data centres are part of a larger hyperscale development, with the potential to deliver up to 134MW on this campus.

Built to support India's mass cloud migration, mobile internet growth and rapid digitalisation of industries, our Colt Mumbai 1 & 2 Data Centres are a fantastic option for banking and financial services organisations, other large enterprises or cloud companies who require scalable capacity to support their data centre requirements.

Service Excellence

Our Colt Mumbai 1 & 2 Data Centres are being developed as part of Colt DCS' joint venture with RMZ, one of the world's largest privately-owned alternative asset owners, who have over 20 years of experience in asset ownership and management in India.

With a single point of contact, customers can be confident they will receive the highest level of service to support their data centre needs 24 hours a day, 365 days a year.

Facilities Overview

- Located in Navi Mumbai
- Designed to a Colt tier 3 specification
- Office facilities
- Parking facilities

Power Capacity

- 22MW of IT power
- 1.45 annualised Power Usage Efficiency (PUE)
- 150MVA x 2 power transformers in N+N configuration
- 220kV GIS dedicated sub-station on site
- 11kV installed power generators
- N+N redundancy on EHV power supply

Cooling

- N+2 cooling units
- Inbuilt leak detection system
- Aisles are Hot Aisle Contained (HAC)
- High efficiency Electronically Commutated (EC) fans
- Backed up by dedicated Uninterrupted Power Supply (UPS)

Connectivity

- 100% carrier neutral
- Access to a high concentration of fibre routes
- Entry to additional connected data centres
- Multiple diverse routes available to key carrier hotels

Security

- 24/7 physical security onsite
- CCTV camera surveillance
- Boundary wall area with perimeter intruder detection system
- Controlled entrance to facilities and infrastructure
- Photo ID and biometric technology authorisation
- Central alarm monitoring system
