

Colocation by **colt**

colt

Within a Colt data centre you will be in one of the world's most connected data centres. Operating 29 carrier-neutral data centres across Europe and the Asia-Pacific region, and with connections to a further 530+ directly connected data centres and over 22 thousand on-net buildings across our network, Colt's Data Centre Services help you keep up with, and plan for, your evolving business. With Colt, wherever you choose to have your colocation services, you can be at thousands of other locations in milliseconds.

Colt is the most connected colocation provider

Colt's Data Centre Services and Connectivity

Meet your business objectives

By offering customers unparalleled connectivity across our network spanning three continents, Colt's one-stop-shop for colocation, network, voice and technology services can meet your complex and evolving business objectives.

Carrier neutral data centres

We appreciate that our customers may want to use other service providers along the way for resiliency

and price competitiveness, which is why each of our 29 data centres offers complete carrier neutrality.

Connected

With connections to Cloud Service Providers, Internet Exchanges, Financial Services Platforms and Content Delivery Networks, Colt's colocation solutions simplify your data centre strategy, providing flexibility and simplicity when it matters most to your business.

24 hour support

Whatever your time zone, whatever your language, we provide support 24/7 to meet your needs and allow you to focus on your core business.

Where you need us

With colocation capacity available across Europe and Asia, Colt is able to support your business needs over wide-reaching geographies. Our flexible and affordable IT

Colocation across Europe and Asia

Colt's Data Centre Services bring a wealth of capabilities to your business. Our flexible and affordable colocation and IT infrastructure solutions help you satisfy the most extreme demands, while giving you the freedom to plan effectively for the future. We operate 29 state-of-the-art data centres across Europe and Asia and have connections to a further 530+ third party data centres across our network, covering 56,000sqm with 24/7 protection and support.

infrastructure solutions help you satisfy the most extreme demands, while giving you the freedom to plan effectively for the future; from a single rack to dedicated halls, we have the capacity to allow you to expand or contract as your business evolves.

Reducing risk

With expansion capacity readily available at most of our facilities, we help you by reducing the risk of long-term planning and over or under

provisioning, enabling you to make shorter-term decisions in line with your business.

Experienced, reliable and stable

With more than 15 years of data centre experience, our reputation has been built on our smart, reliable and speedy delivery of information services, so you can store, protect, access and move critical data and equipment simply and cost-effectively.

Efficient infrastructure

Each of our data halls is supplied with resilient power and cooling infrastructure, giving customers the peace of mind that their data is available 24/7 in an operationally and commercially efficient environment. With dual data centres available in relative proximity and directly connected to over 530 on-net data centres, Colt can meet your business continuity strategy.

More than just colocation

We offer you more than just colocation to help you keep up with your evolving business requirements. We ensure that you have not only the colocation space and power you need, but also the services and expertise to go with it.

Colt DC Connect

Colt DC Connect gives you:

- Flexibility to connect with your choice of partners
- Direct, reliable cable connections
- Low-latency, wireline network performance
- Low-cost alternatives to local loops/purchased circuits
- Fast set-up to get businesses linked quickly
- Enabled connections to all of the possibilities in the data centre

Colt Remote Hands enable you to:

- Deliver resource efficiencies by freeing your teams to focus on business-critical applications
- Reduce off-site time & travel costs
- Remove the need for 24/7 cover and resource planning
- Resolve issues quickly

Colt's Disaster Recovery Space allows you to:

- Remove single points of failure with hot standby sites
- Prevent revenue loss
- Eliminate business reputation loss
- Maintain productivity with critical operations running immediately
- Spare yourself the stress and loss of business likely experienced after an office disaster
- Support your business when it matters most

Keeping your data secure

Multiple layers of security, available both at our data centre facilities and across our network, 24 hours a day, 365 days a year, allow you to lease the resources you need on a secure, predictable and reliable basis.

Don't just take our word for it...

As the first data centre operator in Europe to be awarded with the prestigious M&O Stamp of Approval for operational excellence, along with our Tier III Design Certification, you can be assured your data is in safe hands at a Colt data centre.

About Colt

Colt is the information delivery platform, delivering integrated network, data centre, voice and IT services. Customers include 18 of the top 25 bank and diversified financial groups and 19 out of the top 25 companies in both global media and telecoms industries (Forbes 2000 list, 2014). In addition, Colt works with over 50 exchange venues and 13 European central banks. Colt operates in 28 countries across Europe, Asia and in the U.S. with connections into over 200 cities globally and

metropolitan area networks in 47 cities. Colt operates 22 carrier-neutral data centres in Europe and 7 in the Asia-Pacific region.

Colt recently completed the acquisition of KVH, an integrated managed IT infrastructure and communications services business, with headquarters in Tokyo and operations in Hong Kong, Seoul and Singapore.
