Netherlands 3

Powered by 32 MVA

Netherlands 3 has over 10,000 m² of secure and flexible space providing market leading services.

Highly efficient data centre facilities between 4 major cities

This carrier neutral facility is strategically located between the major cities of Amsterdam, Rotterdam, Antwerp and Brussels. This Colt Tier 3 data centre offers state-of-the-art technology, resilience and 24x7 security. With 10,000 m² over 20 halls, the expansion capability of this site means you will be able to scale and add additional capacity as demand requires. 32 MVA of power will ensure the scalability of the energy supply as the data centre grows in size and requirements.

Service excellence

- Data centre capacity that can scale as your business grows
- ITIL based service management methodology
- High levels of reliability and resilience
- Consistent and efficient service delivery
- ISO 27001 and ISO 14001 certified

Our team is responsible for the entire mechanical and electrical infrastructure in our data centre. This includes management of the data halls, capacity management, security, energy procurement and the programme of planned preventative and corrective maintenance work. With a single point of contact, you can be sure of the highest level of service to support your data centre needs 24/7.

In today’s world, great businesses must be secure, resilient, scalable and above all - connected. At Colt Data Centre Services this is our business. Colt Data Centre Services offers flexible and affordable colocation and IT infrastructure solutions. Our connectivity and colocation solutions allow our customers freedom to plan effectively for the growth of their business, knowing that their data centre strategy is future-proof.

We operate 29 state-of-the-art data centres across Europe and Asia Pacific, offering 24/7 security and local language support. We are connected to a further 530+ third party data centres across our network and are able to offer private links into the major public cloud providers.
