

Colt DCS Helps TNS Switch to a New Data Centre and Provide a Secure, Single Location IT Environment

Global Data Communications provider looks for alternative data centre solutions to meet their data storage and equipment consolidation requirements

Transaction Network Services (TNS) is a leading global provider of data communications delivering managed communications solutions to service providers and enterprises on a global scale.

TNS was looking for a solution that would help meet their physical data centre requirements and provide high availability and scalability. Colt Data Centre Services has proven to be an ideal partner because of their breadth of service provision and their willingness to be flexible. Their accurate understanding of our business requirements has allowed TNS to consolidate its applications and equipment and continue providing enhanced services for customers.

Ciarán Jones
VP, Global Service Operations
at TNS

With their existing data centre lease about to expire and their IT equipment distributed across multiple locations, TNS were looking to improve the way they stored and managed their data and equipment.

Colt DCS proved to be the right fit, capable of consolidating and housing the equipment in a single location as well as providing a secure data centre facility for their business critical data needs.

Colt DCS provided TNS with colocation capacity in our London North Data Centre, a secure and stable environment with power and energy efficiencies helping them meet their environmental commitments.

Our commercial flexibility was another key factor with usage based billing and a phased uptake of capacity suitably matching their short and long-term needs.

Having a new data centre with Colt DCS helps TNS to consolidate infrastructure, save money and improve business efficiency.

This collaboration builds on the already solid relationship between TNS and Colt DCS.

Colt Data Centre Services

In today's world, great businesses must be secure, resilient, scalable and above all - connected.

At Colt Data Centre Services this is our business. Colt Data Centre Services offers flexible and affordable colocation and IT infrastructure solutions. Our connectivity and colocation solutions allow our customers freedom to plan effectively for the growth of their business, knowing that their data centre strategy is future-proof.

We operate 24 state-of-the-art data centres across Europe and Asia Pacific, offering 24/7 security and local language support. We are connected to a further 530+ third party data centres across our network and are able to offer private links into the major public cloud providers.

As the only data centre provider in the world to secure the highest M&O certification by the Uptime Institute, our operational standards are recognised as industry-leading.

Colt Data Centre Services has over 20 years' experience in designing, building and operating energy-efficient, reliable data centres - hosting significant financial, media, corporate and cloud wholesale providers across the world.
