Disaster Recovery Space

colt

Where and when it matters most, working space and communications within secure facilities for business-critical personnel

Benefits at a glance

— Remove single points of failure with hot standby sites

— Prevent revenue loss

— Eliminate business reputation loss

— Maintain productivity with critical operations running immediately

— Spare yourself the stress and loss of business likely experienced after an office disaster

— Support your business when it matters most

Product features

— Dedicated office space on standby, with 24/7 access; shared space available with 24/7 access

— Network termination panels, controllable temperature, carpet flooring, standard office furniture, and same N+1 power as supplied in our data centres

— Telephony and internet package offerings

— VDI service availability

— Security badges with name of company and picture of individual

— Meeting room access and business support (including AV set-up)

— Comfort facilities such as refrigerators, food-heating equipment, and vending machines

— Customers with dedicated space may make changes to the Space with our prior approval

Why Recovery Space?

As businesses rely increasingly on their computer systems, the need to prevent data from being damaged or lost increases greatly. Many businesses know this and prepare for it, for example, by backing up systems and data in more than one data centre.

But what about your people? If your office is struck by any major disruption, how do your people react and continue to manage your business productively? These questions highlight the importance of having a Disaster Recovery (DR) plan that covers the practicalities of working life: a place is needed for people to use systems, run communications networks, and interact with others to keep business going.

Recovery Assurance

Disaster Recovery Space provides your business with assurance that, in the event of a misfortune, replacement equipment is installed, communications are working, and people have a place to gather and work. Complete your DR contingency with office space to augment your DR capabilities for systems and data.

Ensure DR for your office with the same levels of security and resilience you expect in our data centres.

COLT DISASTER RECOVERY SPACE
Where and when it matters most

About Colt

Colt is the information delivery platform, delivering integrated network, data centre, voice and IT services. Customers include 18 of the top 25 bank and diversified financial groups and 19 out of the top 25 companies in both global media and telecoms industries (Forbes 2000 list, 2014). In addition, Colt works with over 50 exchange venues and 13 European central banks. Colt operates in 28 countries across Europe, Asia and in the U.S. with connections into over 200 cities globally and metropolitan area networks in 47 cities. Colt operates 22 carrier-neutral data centres in Europe and 7 in the Asia-Pacific region.

Colt recently completed the acquisition of KVH, an integrated managed IT infrastructure and communications services business, with headquarters in Tokyo and operations in Hong Kong, Seoul and Singapore.
